Summary

Passionate and creative **Full stack .NET** developer with expertise in crafting applications across **Windows**, **Android** and **Web**. I specialize in **C#** and the **.NET** ecosystem — including **Blazor**, **ASP.NET**, **MAUI**, and **Xamarin**.

I've had various experiences in developing applications and web services, and I've faced many different and challenging problems that I managed to solve with patience and persistence. I prefer not to rely on ready-made libraries to overcome challenges, so I've created many libraries of my own, as I've always enjoyed building a project entirely from start to finish.
